SUMMARY

Full Stack Developer with 2+ years of experience building and optimizing business-critical applications using JavaScript, Node.js, React.js and MySQL. Experienced in reducing API latency and improving performance through efficient caching and database query design. Passionate about writing scalable, maintainable code and solving real-world engineering problems.

EXPERIENCE

CSA Engineering | Full Stack Developer | Remote Sept 2024 – Present

- Revamped legacy components of an inhouse ERP system (Project Management, Sales, Finance), improved API response times and system efficiency by over 50% through SQL query optimization, database indexing, and caching.
- Developed a comprehensive time and attendance analytics module, with interactive dashboards to visualize complex tiered overtime calculations, leave balances, and real time analysis with PDF/Excel exports.
- Built a responsive React time logging application based in React, managing complex scheduling state with Context API with Shadcn UI as UI component, while utilizing lazy loading and memoization to optimize component rendering.
- Integrated facial recognition APIs for secure account verification and implemented Google Drive API to automate document storage and file management.
- Implemented rolebased access control (RBAC) workflow and JWT based stateless authentication to protect sensitive payroll and financial data for 150+ internal users.

Xzect Labs | Full Stack Developer Intern | Remote June 2024 – Aug 2024

- Integrated Gemini AI API to build a context aware conversational chatbot for users' fashion and styling queries.
- Built responsive, reusable web components using Next.js and TypeScript for client facing business websites.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python
Frontend: React.js, Next.js, Redux, Shadcn UI, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, Django
Databases: MySQL, PostgreSQL, MongoDB
DevOps & Testing: AWS, Docker, Git, Jest/Vitest, React Testing Library

PROJECTS

CloudChat | Tech: TypeScript, React Native, Node.js, Socket.io, AWS, Express.js | Frontend – Backend April 2026
A cross platform **mobile** messaging application featuring a **Socket.io** backend deployed on **AWS EC2** for real time, low latency communication. Implemented a high performance **NoSQL** schema using **DynamoDB** to handle message persistence and rapid retrieval across mobile client sessions.

InnerNote | Tech: TypeScript, Node.js, Express.js, PostgreSQL, React.js, Material UI | Link Aug 2025
A monolithic fullstack journaling app featuring Face API biometric login, **JWT** auth, and password hashing for data security and **RESTful APIs** with validation/error handling. Deployed application on **AWS EC2**.

LICENSES AND CERTIFICATIONS

The Complete JavaScript Course 2024, Udemy View March 2024 – August 2024
JavaScript (Intermediate) Certificate, HackerRank View July 2025
React.js Essential Training, LinkedIn View May 2024
SQL (Intermediate) Certificate, HackerRank View Sept 2025

EDUCATION

Ambedkar University Delhi | MA Environment and Development 2021 – 2023
Coursework**:** Introductory modules in data analysis (R), basic statistics and mathematical modelling for ecological economics.

Ramjas College, University of Delhi | BA (hons) English 2016 – 2019
