SUMMARY

Full-Stack Developer with 2 years of experience building and optimizing business-critical applications using the MERN stack and PostgreSQL. Experienced in reducing API latency and improving performance through efficient caching and database query design. Passionate about writing scalable, maintainable code and solving real-world engineering problems.

EXPERIENCE

CSA Engineering | Full-Stack Developer

Remote • Sept 2024 – Present

System Optimization: Revamped legacy components of an in-house ERP system (Project Management, Sales, Finance); improved API response times and system efficiency by over 50% through SQL query optimization, database indexing, and caching.

Full-Stack Ownership: Architected an end-to-end payroll module; implemented custom business logic to dynamically calculate variable overtime rates based on different week days, delivering real-time analysis, graphical insights and Excel/PDF reports.

Frontend Performance: Built a responsive, React-based time-booking system and CRM; implemented lazy loading, memoization, and pagination to minimize component re-renders and optimize UI rendering speed.

Feature Integration: Integrated facial recognition APIs for secure account verification and implemented Google Drive API to automate document storage and file management.

Backend Security: Implemented role-based access control (RBAC) middlewares and JWT-based stateless authentication to protect sensitive payroll and financial data for 150+ internal users.

Xzect Labs | Full-Stack Developer Intern

Remote • June 2024 – Aug 2024

AI Integration: Developed responsive Next.js and TypeScript interfaces and integrated Gemini AI API to build a context-aware conversational chatbot for users' fashion and styling queries.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, React Native, Material UI, Bootstrap, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, Django, Prisma ORM

Databases: MySQL, PostgreSQL, MongoDB, Redis

DevOps & Cloud: AWS (EC2, Lambda, S3, DynamoDB, RDS), Docker, Docker Compose, PM2, GitHub

PROJECTS | [VIEW PORTFOLIO](#)

CloudChat | [Frontend](#) – [Backend](#) | Tech: TypeScript, React Native, Node.js, Socket.io, AWS, Express.js

April 2026 - Present

A cross-platform **mobile** messaging application featuring a **Socket.io** backend deployed on **AWS EC2** for real-time, low-latency communication. Implemented a high-performance **NoSQL** schema using **DynamoDB** to handle message persistence and rapid retrieval across mobile client sessions.

InnerNote | [PROJECT LINK](#) | Tech: TypeScript, Node.js, Express.js, PostgreSQL, React, Material UI

July 2025 – Aug 2025

A monolithic full-stack journaling app featuring Face API biometric login, **JWT** auth, and password hashing for data security and **RESTful APIs** with validation/error handling. Deployed application on **AWS EC2**.

LICENSES AND CERTIFICATIONS

The Complete JavaScript Course 2024, Udemy [VIEW](#)

March 2024 – August 2024

JavaScript (Intermediate) Certificate, HackerRank [VIEW](#)

July 2025

React.js Essential Training, LinkedIn [VIEW](#)

May 2024

SQL (Intermediate) Certificate, HackerRank [VIEW](#)

Sept 2025

EDUCATION

Ambedkar University Delhi | MA Environment and Development

2021 - 2023

(Strong analytical background; transitioned into full-stack development)

Coursework: Introductory modules in data analysis (R), basic statistics and mathematical concepts related to ecological economics.

Ramjas College, University of Delhi | BA (hons) English

2016 - 2019
