SUMMARY

Full-Stack Developer with 1.8+ years of experience building and optimizing business-critical applications (ERP, payroll) using the MERN stack and PostgreSQL. Experienced in reducing API latency and improving performance through efficient caching and database query design. Passionate about writing scalable, maintainable code and solving real-world engineering problems.

EXPERIENCE

CSA Engineering | Full-Stack Developer

Remote • Sept 2024 – Present

- **ERP & Infrastructure:** Developed and scaled an extensive in-house ERP system (Project Management, Sales, Finance), improving system efficiency by 40% via MySQL query optimization, caching, and API payload reduction.
- **Payroll & Backend:** Architected an end-to-end payroll module featuring complex data aggregation and automated mailing systems; engineered one-click generation of advanced analytical reports (PDF/Excel) with integrated graphical insights.
- **Frontend Performance:** Built a React-based time-booking system and CRM; implemented performance-focused techniques (memoization, lazy loading, pagination) to minimize re-renders and ensure sub-second UI response times.
- **Advanced Features:** Integrated Biometric/Facial Recognition for timesheets and automated document lifecycles via Google Drive API integration, improving data security and operational speed.
- **Secure System Architecture:** Strengthened application security by architecting a custom RBAC framework and JWT-based stateless authentication, ensuring data privacy for 150+ internal users and protecting sensitive payroll/finance records.

Xzect Labs | Full-Stack Developer Intern

Remote • June 2024 – Aug 2024

- **AI Integration:** Developed responsive Next.js/TypeScript interfaces and integrated Gemini AI APIs to build an intelligent chatbot for fashion and styling queries.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, React Native, Material UI, Bootstrap, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, Django, Prisma ORM

Databases: MySQL, PostgreSQL, MongoDB, Redis

DevOps/Tooling: Docker, Docker Compose, PM2, GitHub

PROJECTS | [VIEW PORTFOLIO](#)

MealMuse: Pick Today's Dish (In Progress) | GitHub: [Frontend](#) - [Backend](#)

Feb 2026 – Present

Tech: TypeScript, Python, React Native, Django, PostgreSQL

A food discovery app featuring REST APIs, JWT authentication with Django Rest Framework, and dynamic multi-filter search powered by advanced ORM queries for personalized meal recommendations.

InnerNote | [PROJECT LINK](#) | Tech: TypeScript, Node.js, Express.js, PostgreSQL, React, Material UI

July 2025 – Aug 2025

A monolithic full-stack journaling app featuring Face API biometric login, JWT auth, and password hashing for data security and RESTful APIs with validation/error handling.

LICENSES AND CERTIFICATIONS

The Complete JavaScript Course 2024, Udemy [VIEW](#)

March 2024 – August 2024

JavaScript (Intermediate) Certificate, HackerRank [VIEW](#)

July 2025

React.js Essential Training, LinkedIn [VIEW](#)

May 2024

SQL (Intermediate) Certificate, HackerRank [VIEW](#)

Sept 2025

EDUCATION

Ambedkar University Delhi | MA Environment and Development

2021 - 2023

(Strong analytical background; transitioned into full-stack development)

Coursework: Introductory modules in data analysis (R), basic statistics and mathematical concepts related to ecological economics.

Ramjas College, University of Delhi | BA (hons) English

2016 - 2019
